

# Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Adventurous Growth Fund, a sub-fund of the RBS Investment Options ICVC (ISIN: GB00B2RJG837)

This Fund is managed by RBS Collective Investment Funds Limited, part of The Royal Bank of Scotland Group plc

## OBJECTIVES AND INVESTMENT POLICY

The objective of this Fund is to achieve capital growth over the long term (minimum recommended holding term of 5 Years).

To achieve this, this Fund is able to invest up to 100% in equity shares but can hold other types of assets such as bonds (fixed interest), property and cash deposits.

This Fund may use derivatives for efficient portfolio management only.

For liquidity management purposes this Fund may also invest in other transferable securities, deposits and units or shares in collective investment schemes.

Investments can be made in overseas assets and the mix will vary over time, but most investments will be in markets in the UK, North America, Europe and Asia. This Fund does not normally invest directly in individual stocks and shares, but makes investments through other funds with specialist managers. The selection of these underlying funds is based upon that fund's investment manager delivering performance within set criteria. The Investment Manager is able to make discretionary choices when deciding which investments should be held in this Fund. These investment decisions will always be made within the constraints of this Fund's objective and investment policy, as documented within the Prospectus.

Any changes to the objectives and investment policy will be notified to you 60 days prior to the change following approval by the FCA and the Depositary.

This Fund does not have targets in relation to any industrial, geographic or other market sector or class of assets but is benchmarked against the IA Flexible Investment Sector, which represents the average of funds with similar investment criteria.

You may normally sell your shares in this Fund on each Business Day. Requests to sell received and accepted by 5pm on a Business Day will be dealt at the price calculated on the next Business Day.

This Fund only issues Accumulation shares and any income is automatically accumulated and reflected in the price of each Accumulation share.

This Fund is designed for retail customers with little or no experience of investing in collective investment schemes and basic or no knowledge of the characteristics and risks of investing in equities and bonds (capital markets).

A typical investor in the Fund has a medium to high tolerance for risk; they accept that the value of their investment may fluctuate and they have a medium to high tolerance to bear losses to their capital. The minimum investment horizon is 5 years.

## RISK AND REWARD PROFILE

These ratings indicate how this Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a higher risk of losses. The lowest rating does not mean a risk free investment.

This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.

The risk and reward category for this Fund is not guaranteed to remain unchanged, and may shift over time.

Historical data, such as is used for calculating the rating, may not be a reliable indication of the future risk profile of this Fund.

The following risk factors contribute to the overall risk and reward indicator:

1. This Fund invests in company stocks and shares and their value depends on the financial state of the underlying companies. Any fall in the financial outlook for, or failure of, such companies can reduce this Fund's share price.

2. As this Fund holds fixed interest securities this Fund's share price will rise and fall due to movements in interest rates and inflation.

3. This Fund invests in overseas investments and the value will go up and down in line with movements in exchange rates as well as the changes in value of this Fund's holdings.

4. This Fund may have some investment in securities issued by companies in so-called 'emerging markets'. This carries a higher risk than investing in larger, established markets.

Investments in emerging markets are likely to experience greater rises and falls in value, and may have problems in trading and settlement.

5. Smaller companies are likely to be financially weaker and less well established than larger companies. Therefore shares in such companies are generally a higher risk investment than shares in larger companies.

6. The valuation of property is generally a matter of valuer's opinion rather than fact. Property may sell for less than it is valued at, which would reduce this Fund's share price. The share price will reflect:

- Property values and rental income
- Capital value and dividends of property related shares.

## CHARGES

### One-off charges taken before or after you invest

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or paid out

### Charges taken from this Fund over a year
